1 Goals within our Contract

- Provide the user an estimate on nutritional information of a single food item according to a given picture, or with a barcode.
- Provide timelines which showcases the user's physique and nutritional behaviours.
- Allow the user to track their daily nutritional requirements (e.g. calories, protein, etc.)
- Securely store user data on the cloud so that users can access their profile information from multiple devices without the need to store data locally.
- Introduce a competitive game aspect among friends/groups (pictures of food and/or nutritional stats).
- Implement an account system for which the user can use to customize their experience with our application.
